

U.S. GLUTEN FREE PRODUCTS

Because we are constantly improving our products, please check the ingredient statement on the label of every product. We will make every effort to keep this list up-to-date.

Gluten is a protein found in rye, barley and wheat (including atta, bulgur, couscous, durum, einkorn, emmer, farina, kamut, seitan, semolina, spelt, and triticale). Due to the potential mixing of grains during harvest, storage, transportation, etc., Campbell has decided to treat oats similar to gluten containing grains.

The following list contains products in which every ingredient in each product was verified as being gluten free. As a further safeguard, we analyze each and every gluten free product to ensure compliance with our strict gluten free standards. We are also continuing our review of new products for their gluten free status and will update our list accordingly. Please visit us at www.campbellswithoutgluten.com for the most up to date gluten free list.
